

OVSU-1

Onboard Vehicle Sanitizing Unit

Comes with all the bulleted points below:

- Solar Panel (to keep battery charged)
- DC pump
- 12V Mini battery
- Charger regulator
- Auxiliary Power Cable (for connecting to an alternate power source, ie; cig lighter)
- Keyfob and Receiver
- 5 gallon bucket with ¼ turn screw on lid
- Handheld wand for spraying off boots or tools before putting them back in truck
- 40' of pre assembled hose. (Fits most all Pickup trucks.)
- Handheld wand and 15' of hose for spraying off boots and equipment
- 4 pre-connected nozzles
- 4 insulated clamps for mounting
- Mounting clips and screws and cable ties
- Bed Rail Mounting Bracket
 - Durable Weather Resistant steel
 - C-Clamps (included) to bed rail for easy installation and removal
 - Secondary E-clip Mounting System for mounting to back of toolbox or in panel truck
 - Strap for securing unit to mount
 - All hardware (bolts, nuts and washers) for assembly

Preferably it should be mounted over the fender well to take up the least amount of room, but can be mounted anywhere on the bed rail as long as you can get a mini c-clamp in place.

Total Unit investment includes all the above-\$675 plus shipping

Thanks for your continued support!

And stay tuned for other great BioSecurity Products and Videos from BioSecurity Strategies & Equipment!

Battery is now kept in control box.

New Battery connections for easy installation and removal!

Custom Built Mount for Bedrail
